

MERINO COMPUTER CONCEPTS

SERVICE BRIEF

Hosted Server and Infrastructure

Maintaining your own server and IT infrastructure is very costly. With Merino Computer Concepts, get exactly what your business needs without the overhead.

Server Design and Implementation

Improve Your IT Infrastructure with Server Design and Implementation Services From Merino Computer Concepts

Implementing the right server can be a major problem for a business. What happens if your servers were to fail? Do you have a backup option? With Merino Computer Concept's server design and implementation services, you'll get comprehensive IT infrastructure design and the expertise to put in place a secure and dynamic server for your core business needs.

Server Installation

Expert server installation to get your IT infrastructure up and running fast.

Every business has different server needs, and Merino Computer Concepts have the know-how to produce server solutions that work for all fashions of business computing. We'll design a server which best fits your company's needs and implement the solution so you can get to work. The capital expense of purchasing a new server and getting it calibrated can cost your business a lot of time and money. By taking advantage of our flat rate IT services, you can relax with the knowledge that we'll find you the best deal around for a quality piece of hardware. We'll also work with you to develop a thorough IT roadmap that will help your organization prepare for your thorough IT renovation. By knowing exactly where all of your assets are going, you can better prepare for the future of your business.

Virtualize and Consolidate Your Server

Utilizing our hosted server can present receive the dynamic computing options you are looking for such as scalability and affordability.

Physical servers place severe limitations on your company's potential, and take up lots of space and are at the mercy of any number of disasters. Remediate this

issue by switching to a single powerful virtual server. With our hosted server solutions, you'll be able to:

- Remove the cost of physical server maintenance and repair bills by removing the physical server altogether.
- Experience minimal downtime while we're performing server maintenance.
- Continue working while we resolve any issues that are created.

Waste No Time with Server Migration

Quick migration of data to keep your business up and running, while improving your technology.

When it comes time to moving your data from one server to another, the process can cause substantial downtime. At Merino Computer Concepts, we can provide you with the level of professional expertise your company looks for in a IT services partner. We'll work to get your data migrated from your old server to your new server as quickly and painlessly as possible, regardless of the solution your organization selects. While we are moving your company information, your employees will still be able to work, minimizing downtime and increasing productivity.

Designing the perfect server for your needs is crucial for your business. We'll work tirelessly with you to make sure your business gets the most out of your servers. We also feature data redundancy solutions that promote uptime. For more information about our server design and implementation services, call us today at (209) 365-6800.
