MCC
MERINO COMPUTER CONCEPTS

SERVICE BRIEF

Healthcare IT Support and Implementation

Reduce costs, increase the quality of the care provided, and improve the lives of patients with Managed IT services.

Healthcare IT Support and Implementation

HIPAA-compliant technology services from your California IT leader.

It wasn't always so, but nowadays technology plays an important role for healthcare providers. There has been a strategic push to ensure that these healthcare providers protect the sensitive information that healthcare organizations need to properly conduct business. The Department of Health and Human Services has begun to crack down on healthcare providers that don't adhere to the regulations set forth in the Health Insurance Portability and Accountability Act of 1996 and the subsequent amendments to the law.

DSS mandate. To coordinate the necessary security measures, the professional technicians at Merino Computer Concepts will assess your company's ability to securely accept credit card payment and file sensitive financial information.

The Benefits of a Merino Computer Concepts' Healthcare IT Support

The trusted IT professionals at Merino Computer Concepts can bring your practice complete medical IT solutions.

The trusted IT professionals at Merino Computer Concepts can bring your practice complete medical IT solutions.

Understanding the makeup of HIPAA/HITECH and their effects on your practice, can be truly beneficial. At MCC, we provide the HIPAA-certified technicians that know how to set up an

efficient and secure IT infrastructure. This provides multiple benefits that include:

- We have a thorough understanding of the components that go into a HIPAA-compliant IT system, and how to implement a dynamic and secure IT infrastructure.
- We have corporate partners that make it easy, fast, and affordable to set up your HIPAA-compliant IT.
- We excel in the proliferation of IT services, giving you the access to the expertise you need, when you need it.
- We are versed in the best practices of network security and can provide you with a dynamic business partner through our comprehensive network monitoring, management, and maintenance.
- Our affordable monthly-billed flat-rate IT service, allows your practice to easily budget for your essential technology.

If your organization needs to implement or support a HIPAA-compliant IT infrastructure look no further than Merino Computing Concepts. For more information about our comprehensive healthcare IT support services, call us today at Merino Computer Concepts.
