SERVICE BRIEF

Cloud IT Solutions

Eliminate expensive start-up costs and IT management overhead with enterprise-level cloud solutions.

Cloud Design, Support, and Implementation

Coordinated cloud solutions that let you get the most out of your company's IT.

Are you considering using cloud computing to enhance your company's productivity? Look no further. The IT professionals at Merino Computer Concepts can design, implement, and support a comprehensive cloud computing infrastructure that will give your company the mobility boost you are looking for. We can design a cloud computing system that will give you the flexibility of cloud computing while supplying the computing power your company needs.

There are three main deployment models for cloud computing: Public cloud, private cloud, and the hybrid cloud. The three are defined as:

- **Public Cloud**
- **Private Cloud**
- **Hybrid Cloud**

At Merino, our certified technicians are proficient in the creation of in-house or hosted cloud solutions that directly meets your organization's needs. From mission-critical processes like email, to software development platforms, Merino Computer Concepts has hosting solutions that fit any computing need your company might have.
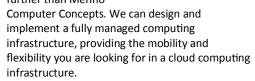

Hosted Solutions Make IT Affordable

Get the cloud system you are looking for with a solution from Merino Computing Concepts.

The proliferation of an efficiently-designed and dynamic cloud computing system not only provides your organization with the mobility you seek, it also provides the opportunity to avoid the large capital outlays that normally accompany technology. We provide a comprehensive hosted server solution that allows your organization the flexibility of paying for the computing power you need. Our solution also features redundancy to ensure for optimal uptime and data security.

If your organization is searching for a cost-effective alternative to buying new hardware, or if you are searching for a partner to help you increase your computing capabilities without paying the high cost of new hardware, or taking on the costs usually associated with it, look no further than Merino Computer Concepts. We can design and implement a fully managed computing infrastructure, providing the mobility and flexibility you are looking for in a cloud computing infrastructure.

In today's marketplace, companies have begun to embrace enhanced mobility as a way of getting more out of their staff. Don't waste valuable financial resources on your organization's IT, call Merino Computer Concepts today at (209) 365-6800!

Features

- Highly scalable, flexible hosted IT solutions
- Includes server management, maintenance, and support
- Bypass the expensive initial costs and reduce your monthly IT costs
